

Photography Prints

Prints of images from Dunmaglas Photography are available to order in a wide range of bespoke sizes and print formats. Many images can be cropped to suit different aspect ratios and prints can be matted and framed to suit your requirements.

Product Examples

Digital C-type Prints

'C-type' or 'Lambda' prints are the standard and most popular option for all purpose photographic printing. Prints are on photographic paper with a choice of lustre, gloss and metallic finish.

These will be provided mounted and matted (cardboard backing and border) in a choice of border colours with optional framing service.

Giclee Prints

Giclee prints are produced on archival quality fine-art paper using an inkjet printing process with archival inks.

These will be provided mounted and matted (cardboard backing and border) in a choice of border colours with optional framing service.

Canvas Prints

A popular option for ready-to-hang display of art prints with a lustre finish. Requires no framing.

Acrylic Prints

Gloss, satin and metallic finish prints mounted on an acrylic panel for a product that is durable and ready to hang on your wall. Can be hung with or without framing – ideal for a minimalist, contemporary, borderless display.

Aluminium Prints

Prints on aluminium sheet using an image transfer process. These offer superior durability waterproof and scuff resistant. Ideal for display in places where there may be changes in humidity, moisture or condensation. Can be hung with or without framing – ideal for a minimalist, contemporary, borderless display.

Matting and Framing Prints

For c-type and giclee prints, mounting and matting the finished print prevents the print coming into contact with the glass of a frame and creates an attractive border.

For most prints a black minimalist frame with a white or off-white matt is recommended.

Production

Print production is done by Glasgow based Loxley Colour, one of the UK's leading professional photographic printing services, so you can be assured of a top quality product. A full printing, mounting, matting and framing service is available.
